Iridium Approves World's First 9555 Docking Station with inbuilt RJ11 & Tracking

World Reach Limited subsidiary Beam Communications Pty Ltd today received formal approval for its "PotsDOCK" Docking Station for the Iridium 9555 Handheld Satellite phone which incorporates an RJ11 / POTS (Plain Old Telephone Service) interface and integrated GPS for Alert & Tracking applications.

The Beam PotsDOCK, completely designed and manufactured in Australia, is again the first of its kind in the world to be approved by Iridium. The PotsDOCK docking station enables the Iridium 9555 handheld satellite telephone to extend its use to incorporate applications using a standard RJ11 corded, cordless handset or to be integrated with a PBX system for in-building use along with the intelligence to perform an Alert/Alarm & Tracking functionality using the fully integrated GPS system.

Beam has a proven track record in the development of docking units for Iridium handsets and this latest approval reinforces Beam's premier market position in the handheld satellite accessory market. This latest addition to the Beam range brings together Beam's expertise in manufacturing high quality docking stations with the added features for tracking and monitoring applications all within one simple docking unit.

PotsDOCK commenced selling in July and achieved strong market acceptance by its global distribution channels. The PotsDOCK is the latest docking station to be approved by Iridium as part of Beam's overall new range of Dock's designed specifically to increase the application and use of the new Iridium 9555 handheld.

PotsDOCK 9555 FEATURES

- RJ11/POTS Connectivity
- Ring, Busy & Dial tones
- Supports standard corded and cordless telephones
- In-built GPS alert & tracking system
- Bluetooth Voice & Data Connectivity
- Integrated USB data Port
- Easily Integrated to PBX system
- Integrated antenna connection
- Charges 9555 Handset
- 9 - 32V DC Input
- Supports Voice & Data services
- Inbuilt Ringer
- Easy & Convenient Installation
- Optional Handset - Privacy mode
- Superior voice quality
- Tracking and Alert monitoring capable
- Compatible with many tracking applications
- 2-year replacement warranty
- Supports all Iridium voice, data, SMS & SBD services
- Universal Mounting Bracket
- Fully Certified - Including RoHS
- Easy to install

About Beam Communications Pty Ltd

Beam Communications Pty Ltd is a wholly owned subsidiary of World Reach Limited; The Beam Communications subsidiary was established in 2002, making a substantial investment in the development and manufacturing of Remote Satellite Communications solutions for the global telecommunications market.

Beam was the first company to design and manufacture a fully compliant POTS emulation phone service for the Iridium Satellite network using its Remote Satellite Terminals. Now one of the leading global manufacturers of satellite communication equipment, Beam offers the widest range of Iridium solutions across all market segments.

Beam solutions are deployed into a wide range of vertical markets including Maritime, Transport, Government, Defence, Mining, Construction, Forestry, Emergency Services, Relief Aid, Telemetry and Rural Telephony.

Now one of the leading global manufacturers of Iridium-based satellite communications equipment, Beam offers the widest range of Iridium solutions across all market segments, and is particularly focused on the exploitation of the newly released Iridium data module targeted at asset tracking and other applications.

Beam prides itself on its ability to develop broad market applications as well as specific dedicated products and solutions.
